

WHY WORK WITH MACROZA WALL CHASERS

- **Timesaver: more metres, less time**  
Fastest wall chasing machine on the market
  - **A cost-efficient chasing solution**  
Save up to 80% in time and material waste
  - **No breakage, clean chases**  
Clean, lean chases in one cut only
  - **Less fuss, less dust**  
Does not grind the material avoiding dust production
  - **Attaches itself to the wall**  
Chaser's weight is not borne by the user, but the wall
- **Most powerful in the market**  
Able to work on materials other wall chasers cannot
  - **Built to last**  
Low machine maintenance
  - **Maximum security**  
Exclusive accident-free design
  - **Open straight and round chases**  
No gap at corners and ceilings
  - **Dust collection**  
Optional dust & debris collection available

MACROZA MILLING CUTTERS

PREMIUM SERIES		Size (width x depth)
M90, M95, SC300 PRO	RD 10	25 mm x 25 mm
	RD 105	30 mm x 30 mm
	RD 11	25 mm x 35 mm
	RD 12	15 mm x 45 mm
SC300 PRO	RD 115	35 mm x 35 mm
	RD 125	40 mm x 40 mm
	RD 150	50 mm x 50 mm

MILING CUTTER PERFORMANCE TABLE

MATERIALS	Linear meters before sharpening	Hours before sharpening *	Miling cutter lifespan *
Hollow clay brick	400 metres	4-6 hours	12,000 -14,000 metres
Solid clay brick	200 metres	2-4 hours	4,000 - 6,000 metres
Cement block	150 metres	1-3 hours	3,000 - 5,000 metres
Mortar rendering wall	300 metres	2-4 hours	5,000 - 7,000 metres
Plaster wall/AAC block	500 metres	4-6 hours	16,000 -18,000 metres

\*Life of milling cutters will depend greatly on the kind, quality & abrasion degree of the materials used.

Rozadoras • Wall Chasers

Wall Chasers

Innovating since 1956

**MACROZA** Wall Chasing machines make exceptionally **easy, clean and fast** the chasing job in walls and partition walls due its exclusive design and outstanding performance.

The ideal tools for professionals, easing the hard work of **embedding wires, conduits, pipes** for the **electrical, plumbing, heating and air-conditioning industries**.

- ✓ **Save up to 150% in time and material waste**
- ✓ **No dust produced**
- ✓ **Attach themselves to the wall**
- ✓ **Work on all building materials:**
  - **Hollow & solid clay bricks**
  - **Cement blocks**
  - **AAC blocks**
  - **Mortar rendered walls**

## M90

**Power 2,200 W**

- **Fast & clean chases in one step**

MACROZA Wall Chasers are light & versatile, the ideal machines to work in places which require sturdy, robust and reliable equipment. Their fast and clean avoid damaging the walls and material waste.

**MORE METERS, IN LESS TIME**

- **Cost-efficient, chasing solution**

Our Wall Chaser performs clean, perfect chases in a single pass. Compared to other chasing solutions, MACROZA will allow you to save up to 150% in time and material waste. The benefits in efficiency & productivity allow users to recover their investment in a short period of time.

**TIME & LABOUR COST SAVER**

### TECHNICAL SPECIFICATIONS

	M90	M95	SC300 PRO
Motor	Single phase		
Voltage	230 V or 110 ~ AC		
Frequency	50 Hz / 60 Hz		
Power at full load	2,200 W	2,400 W	2,800 W
Max. consumption	8 Amp	9 Amp	12 Amp
Cutter speed (r.p.m.)	1,200	1,400	1,800
Weight (Kg.)	7.6	7.5	7.7
Acoustic power level (dBA)	92	94	98
Vibration level (m/s <sup>2</sup> )	4/9	4/10	4/10
Body material	Injected aluminium		
Miling cutter cover	Polycarbonate		
Designed for:	Hollow/solid clay bricks AAC walls Rendered walls	Hollow/solid clay bricks Cement blocks Rendered walls	Solid clay bricks Hard cement blocks Mortar rendered walls

## M95

**Power 2,400 W**

- **Attach themselves to the wall**

They are exclusively designed to attach themselves to the wall once inserted. Weight is borne by the wall, not the user, to open chases just guide the machine in the direction of the chase.

**WORK LONGER WITH LESS EFFORT**

- **Less fuss, less dust**

Our machines are the only ones capable of reducing dust production. The cutter's low speed does not grind the material, but cuts it producing small pieces of debris that fall evenly to the floor.

**NO NEED OF DUST COLLECTION**

- **Most powerful in the market**

MACROZA works on almost all building materials, including hollow & solid clay bricks, mortar rendering walls, cement blocks and AAC blocks.

**HEAVY DUTY EQUIPMENT**

- **Chases of up to 5x5 cm**

MACROZA SC300 PRO is the only wall chaser able to open chases of up to 5x5cm in a single pass.

**WIDER & DEEPER CHASES**

## SC300 PRO

**Power 2,800 W**

## DUST COLLECTION

M95 and SC300 PRO have **optional dust collection attachment** for working on internal renovations or retrofitting (supplied with the equipment).

We recommend our **MDE1 dust collector**.

## MILLING CUTTERS

MACROZA's cutting device is a blade fitted with Carbide Tungsten tipped teeth. We have 7 sizes in **Premium RD** to suit different job applications and cutting requirements.
